Ratings for Air and Sound Performance

Hartzell Fan, Inc. certifies that the Series 04, Steel In-line Centrifugal Fans, Type BA and Type BC, air and sound performance ratings shown herein are reliable and accurate and in accordance with industry standards. The ratings shown are based on tests and procedures performed in accordance with AMCA Standard 210, Standard 300, and Standard 301.

Sound Performance data is available upon request. Please contact the factory and ask for Engineering Publication #SD-154.

Hartzell Fan, Inc. certifies that the Series 04, Steel In-line Centrifugal Fans, Type BA and Type BC, shown herein, is authorized to bear CE Marking in accordance with Machinery Safety Directive 98/37/EC of the European Union. Reference Technical File E.S. 13.2.1.

Hartzell Model Code Explanation

Motor Horsepower

Horsepower	1/4	1/3	1/2	3/4	1	1 1/2	2	3	5	7 1/2	10	15	20	25	30	40	50	60	75	100	125	150	200
Code Letter	D	E	F	G	H	I	J	K	L	M	N	O	P	Q	R	S	T	U	V	W	X	Y	Z

Example:

Assume a needed performance of 22,500 CFM at 8" SP, standard air. Reading the performance table on page 14 we find a Series 04, Size 36" with a type BC wheel and a fan RPM of 1,387 and brake horsepower (BHP) of 43.2. Required motor horsepower is 50.

The model code can be constructed as follows: Type will be a production item (code A), product series for the Steel In-Line Centrifugal Fan is 04, arrangement required for the application is 9,

size is 36, class of construction is II, (Code "2"), wheel type is BC, material for construction is Steel (code ST), motor enclosure will be Totally Enclosed Fan Cooled (code FC), motor horsepower is 50 (code T), and motor RPM/phase is 1750 (code 3).

Note: All other informational fields must be filled with hyphens/dashes (-) if they are not applicable to the fan being considered.

This bulletin lists Hartzell's line of Steel In-Line Centrifugal Fans and accessories. More than 70 Hartzell offices can provide specific performance and installation data to meet your requirements. Call your Hartzell representative for assistance. Visit our website (www.hartzellfan.com) or call toll-free (1-800 336-3267) for the name of your Hartzell representative.

Series 04 Steel In-line Centrifugal Fan

Hartzell Series 04 Steel In-Line Centrifugal Fan offers non-over-loading, high efficiency, low noise, and economy for clean air applications at medium to high pressures. It combines the design advantages of the axial flow fan with the performance characteristics of the centrifugal fan. The "tubular centrifugal," or in-line fan, offers straight airflow for duct installations with the proven, highly efficient, backward curved airfoil-bladed wheel in a vane-equipped housing. This design saves space as compared to the traditional scroll-type centrifugal housing by incorporating a tubular housing. The design allows the unit to be installed directly in a duct system with the same inlet and discharge dimensions. The inline design incorporates guide vanes and airfoil centrifugal

wheel to produce a compact, highly efficient unit with low noise characteristics.

Applications - Developed for clean air applications where it is advantageous to have the motor out of the airstream with the versatility of a belt drive fan.

Performance - Type BA and BC wheel with inlet cone and housing built in aerodynamically designed straightening vanes produces from **900 CFM to 72,000 CFM** at pressures from **free delivery to 14" W.G.** at **high efficiencies with** non-over-loading horsepower, low noise, and low RPM. Maximum temperature capability is 180°F.

Series 04

Shown with optional equipment.

Hartzell Fan, Inc. certifies that the Series 04, Steel In-line Centrifugal Fans, Type BC and Type BA, air and sound performance ratings shown here-in are reliable and accurate and in

accordance with industry standards. The ratings shown are based on tests and procedures performed in accordance with AMCA Standard 210, Standard 300, and Standard 301.

Sound Performance data is available upon request. Please contact the factory and ask for Engineering Publication #SD-154.

Features

- **Sizes** - 12-49" wheel diameters. Available in Class I, II, and III construction in Arrangements #9 and #1. Also available in Power Roof Ventilator configuration.
- **Standard Construction** - The Hartzell Series 04 Steel In-Line Centrifugal Fans incorporate Heavy Industrial Duty Construction. Designed for heavyweight service with ruggedness, use, long life, reliability, and long life taken together. Housings are continuously welded with platform style motor base built of heavy gauge hot rolled steel.
- **Type BC or BA Wheel** - High efficiency design with tapered inlet side design efficiently moves large volumes of air at high pressures. Wheel has non-overloading horsepower characteristic curve. Split taper bushings are utilized as standard to provide secure attachment to the shaft and easy removal for maintenance.
- **Balancing** - The fan is electronically statically and dynamically balanced to the requirements of Fan Application Category BV-3 of AMCA ANSI Std. 204-96. All fans receive an inspection prior to shipment and, whenever possible, fans are test run.
- **Bearings** - Bearings are heavy duty ball or roller type, in cast iron housings, selected for minimum L-50 Life of 250,000 hours for horizontal fans, and include extended lubrication fittings as standard.
- **Shafts** - Shafts are turned ground and polished, keyed at both ends and sized to operate well below critical speed.
- **Standard Shaft Seal** - A Membrane type neoprene shaft seal is placed where the shaft leaves the housing. Seal is not gas tight.
- **Standard Finish** - Standard fans and accessories are pretreated and painted with blue industrial duty air dry enamel. Alternate coatings are available for corrosive environments.
- **Motor Out of the Airstream** - Exterior mounting on fully adjustable platform style motor base supported by external housing assembly base. Open-end motors are standard. Motors larger than 30 HP will be shipped separately for mounting on unit at job site. Motor HP and frame size limits are identified in Dimensions and Material Specifications table.
- **Drives** - V-Belt Drives are oversized for long life and continuous duty. Variable pitch drives are standard option for 10 HP and below and fixed pitch as standard option above 10 HP. Belts are oil, heat, and static resistant type.
- **Options and Accessories** - See pages 19 and 20.
- **Spark Resistant Construction** - Spark Resistant construction is an available option, see page 19.
- **Special Materials of Construction** - Alternate materials of construction; stainless steel, aluminum, fiberglass housing, and other materials are available upon request.

Wheel Design

Type BC Wheel

The Hartzell backward curved centrifugal Type BC wheels have single thickness airfoil blades. The heavy-duty steel construction is reinforced depending on size and class of construction. The wheel's inlet rim is a tapered spun orifice. The inlet rim is overlapped by the fan's spun inlet cone with closely held tolerances to ensure maximum performance and efficiency.

Type BA Wheel (Airfoil)

The Hartzell backward curved centrifugal Type BA wheels have double thickness hollow airfoil blades. These blades are die formed in a true airfoil shape. The backplate and inlets on the Type BA wheels are the same configuration as the Type BC.

Hartzell Selection Guide

The Hartzell Series 04, Steel In-Line Centrifugal Fan performances on the following pages are based on standard air conditions (sea level, 70°F, and 29.92 inches barometric pressure). Performance data does not include drive losses.

How to use Performance Tables

(1) Select a model for a given air delivery and pressure by looking up the required flow vertically along the left column of the performance table and moving to the required pressure. The model is identified with each table.

(2) Note the required RPM and BHP. Refer to page 2 Hartzell Model Code Explanation for additional details.

(3) If non-standard temperature or altitude is involved, correct to standard air density (see Temperature/Altitude Applications).

When placing your order, be sure to specify the Hartzell Model Code. Be sure to include fan model, performance requirements, operating temperature, motor data (enclosure, voltage, mounting position, etc.), and a list of required accessory items. (See pages 18 and 19.) For selection assistance and additional data contact your local Hartzell Sales Representative for assistance.

Temperature/Altitude Applications

When a fan operates in ambient conditions, generally it is handling standard air at 70°F, 29.92" barometric pressure, weighing 0.075-lbs./cu. ft. For an application where the fan operates at other than ambient conditions (temperature, altitude, or both), correction factors must be applied to the selection of the fan. In addition, the standard construction of the fan must be modified.

Correction factors for temperatures and altitudes are provided in Table 1. When a fan operates at other than ambient conditions,

the correction factors in Table 1 will be required to correct static pressure and horsepower.

Table 2 shows the maximum safe operating speeds for each size fan wheel. At high temperatures, these maximum safe operating speeds should be derated.

Table 3 provides maximum safe speed correction factors by temperature and material construction. An example on the use of these tables appears at the bottom of this page.

Table 1 Altitude/Temperature Correction Factors

Temp.* (°F)	-25	0	25	50	70	100	150	180
Factor	0.82	0.87	0.91	0.96	1.00	1.06	1.15	1.20

Alt.** (Ft.)	0	1,000	2,000	3,000	4,000	5,000	6,000	7,000	8,000	9,000	10,000
Factor	1.00	1.04	1.08	1.12	1.16	1.20	1.25	1.30	1.35	1.40	1.46

Above table has inverted values. Actual density is the reciprocal of the above values. *At sea level. **At 70°F. For corrections involving both temperature and altitude, correction factors should be multiplied.

Example: 150°F at 7000 ft.: Temperature factor 1.15 x altitude factor 1.30 = 1.50 combined correction factor.

Table 2 Maximum Safe Speeds @ 70°F

Size	Maximum Speed (RPM)		
	Class I	Class II	Class III
12	3417	4455	4850
15	2722	3549	4471
18	2147	2800	3527
22	1756	2289	2884
24	1572	2050	2582
27	1401	1827	2302
30	1291	1683	2120
33	1181	1540	1941
36	1083	1412	1779
40	969	1263	1591
44	876	1142	1439
49	796	1037	1307

Use of Correction Factors and Tables

First select size, RPM and BHP of the fan needed.

If temperature or altitude is involved, correct to standard air.

Example: Assume the required performance to be 22,500 CFM at 6" SP, 150°F and 7000 feet altitude.

1. Temperature factor 1.15 x altitude factor 1.30 = 1.50 combined correction factor.
2. Correct SP to standard 6.0" SP x 1.50 = 9.0" SP for 70°F at sea level.
3. A Series 04, size 36" class II Steel In-Line Centrifugal Fan, selected from the rating tables (page 14) for the new condition shows 22,500 CFM at 9.0" SP, 1,455 RPM and 48.8 BHP.
4. Correct the horsepower and static pressure in item 3 to non-standard performance by dividing by factor: 9.0" SP divided by 1.50 = 6.0" SP; 48.8 BHP divided by 1.50 = 32.5 BHP.
5. Check the maximum safe speed. Maximum speed at 70°F for fan size 36" Class III, 1,941 RPM. Using the maximum safe speed factor table for steel construction yields a safe speed factor of 1.00. The maximum safe speed is 1,941 x 1.00 = 1,941 RPM; thus operation at 1,455 RPM at 150°F is satisfactory.
6. Final performance of the unit at the assumed conditions: 22,500 CFM at 6.0" SP, 1,455 RPM, 32.5 BHP at 150°F and 7000 feet altitude.
7. Size motor for cold startups and use a special high altitude motor if altitude exceeds 3300 feet.

Table 3 Maximum Safe Speed Correction Factors*

Material Code	Spark Resistance	Material of Construction Housing/Wheel	Temperature °F.		
			0°F.	70°F.	180°F.
ST	None	Steel / Steel	1.000	1.000	1.000
S4	None	304 Stainless / 304 Stainless	1.000	1.000	1.000
AA	AMCA "A"	Aluminum / Aluminum	0.966	0.948	0.871
AB	AMCA "B"	Steel / Aluminum	0.966	0.948	0.871
AC	AMCA "C"	Steel with Alum Buffer / Steel	1.000	1.000	1.000

*To correct maximum safe operating speeds (Table 2) for high temperatures, multiply those speeds by correction factors from Table 3.

Hartzell Steel In-line Centrifugal Fan Classifications

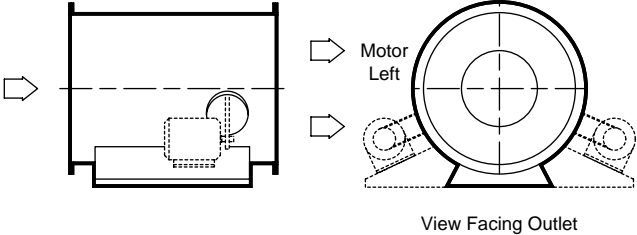

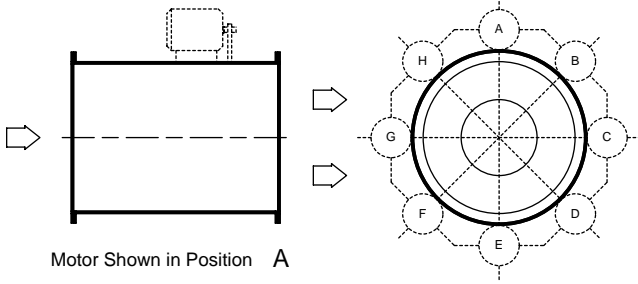

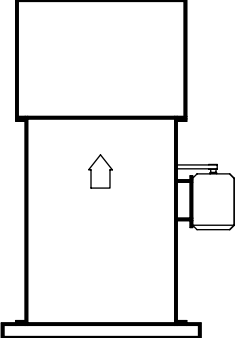

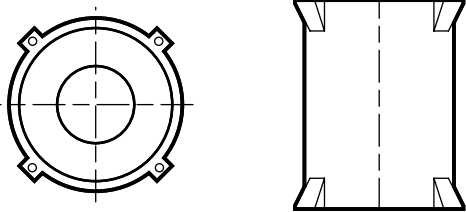

Hartzell Series 04 Steel In-Line Centrifugal Fans are designed and classified to perform within the centrifugal fan classification parameters established by AMCA Standard No. 2408; AMCA

Publication 99. Hartzell Series 04 Steel In-Line Centrifugal Fans are available in Class I, II and III construction. These parameters are explained in the following table.

Fan Class	Performance Range	Table Shading
I	5" at 1,250 FPM to 2½" at 1,800 FPM	
II	8½" at 1,630 FPM to 4½" at 2,350 FPM	
III	13½" at 2,050 FPM to 6¾" at 2,950 FPM	

* At standard air conditions (70°F., 29.92 in. HG barometric pressure, .075 lbs./ft.3). Static pressure shown in inches of water; outlet velocity shown in feet per minute.

In-line Centrifugal Fan Arrangements

<p>Arrangement 1</p>  <p>View Facing Outlet</p> <p>Motor Left</p> <p>For belt drive. Impeller overhung on a shaft supported by bearing mounted with casing. Motor mounted independent of casing. Horizontal discharge.</p>	<p>Arrangement 9</p>  <p>View Facing Outlet</p> <p>Motor Shown in Position A</p> <p>For belt drive. Impeller overhung on a shaft supported by bearings mounted with casing. Fan may be rotated to achieve motor positions. For horizontal and vertical discharge. Duct mounting shown.</p> <p>Arrangement 9 can be furnished with supports for floor, wall or ceiling mounting. The position of these supports determines which motor locations are available for motor placement. Generally motor locations D, E and F are not available on floor, wall or inverted ceiling mounted fans and motor locations B, C, G & H may not be available for ceiling hung fans.</p>
<p>Arrangement 9 - PRV</p>  <p>When desirable, the in-line centrifugal fan can be mounted as a power roof ventilator for exhaust application. Together with a stack cap and panel, the three elements combine to provide an efficient roof exhauster. Back draft dampers in the stack cap offer weatherproof closure for vertical air discharge.</p>	<p>Vertical Mounting</p>  <p>Another method for mounting vertical fans is shown in the view above. Specify fan to be furnished with ceiling mounting brackets, floor mounting brackets or both.</p> <p>Specify either upblast or downblast discharge for vertically mounted fans.</p>

Adapted from AMCA Standard 99-2404-03, *Drive Arrangements for Centrifugal Fans*, and AMCA Standard 99-2407-03, *Motor Positions for Belt or Chain Drive Centrifugal Fans*, with written permission from Air Movement and Control Association International, Inc.

Performance shown is for installation Type D: ducted inlet/ducted outlet. Power rating (BHP) does not include drive losses. Performance data is based on standard air conditions (0.075 #/ft.3). Performance ratings do not include the effects of appurtenances in the airstream. **MOST EFFICIENT FAN SELECTION APPEARS IN BOLD PRINT.** To complete model code, add arrangement, class of construction, material code, motor enclosure code, motor horsepower code and motor speed code. Refer to page 2 for more information.

Performance shown is for installation Type D: ducted inlet/ducted outlet. Power rating (BHP) does not include drive losses. Performance data is based on standard air conditions (0.075 #/ft.3). Performance ratings do not include the effects of appurtenances in the airstream. MOST EFFICIENT FAN SELECTION APPEARS IN BOLD PRINT. To complete model code, add arrangement, class of construction, material code, motor enclosure code, motor horsepower code and motor speed code. Refer to page 2 for more information.

Performance shown is for installation Type D: ducted inlet/ducted outlet. Power rating (BHP) does not include drive losses. Performance data is based on standard air conditions (0.075 #/ft.3). Performance ratings do not include the effects of appurtenances in the airstream. MOST EFFICIENT FAN SELECTION APPEARS IN BOLD PRINT. To complete model code, add arrangement, class of construction, material code, motor enclosure code, motor horsepower code and motor speed code. Refer to page 2 for more information.

Performance shown is for installation Type D: ducted inlet/ducted outlet. Power rating (BHP) does not include drive losses. Performance data is based on standard air conditions (0.075 #/ft.3). Performance ratings do not include the effects of appurtenances in the airstream. MOST EFFICIENT FAN SELECTION APPEARS IN BOLD PRINT. To complete model code, add arrangement, class of construction, material code, motor enclosure code, motor horsepower code and motor speed code. Refer to page 2 for more information.

Performance shown is for installation Type D: ducted inlet/ducted outlet. Power rating (BHP) does not include drive losses. Performance data is based on standard air conditions (0.075 #/ft.3). Performance ratings do not include the effects of appurtenances in the airstream. **MOST EFFICIENT FAN SELECTION APPEARS IN BOLD PRINT.** To complete model code, add arrangement, class of construction, material code, motor enclosure code, motor horsepower code and motor speed code. Refer to page 2 for more information.

Performance shown is for installation Type D: ducted inlet/ducted outlet. Power rating (BHP) does not include drive losses. Performance data is based on standard air conditions (0.075 #/ft.3). Performance ratings do not include the effects of appurtenances in the airstream. MOST EFFICIENT FAN SELECTION APPEARS IN BOLD PRINT. To complete model code, add arrangement, class of construction, material code, motor enclosure code, motor horsepower code and motor speed code. Refer to page 2 for more information.

Performance shown is for installation Type D: ducted inlet/ducted outlet. Power rating (BHP) does not include drive losses. Performance data is based on standard air conditions (0.075 #/ft.3). Performance ratings do not include the effects of appurtenances in the airstream. MOST EFFICIENT FAN SELECTION APPEARS IN BOLD PRINT. To complete model code, add arrangement, class of construction, material code, motor enclosure code, motor horsepower code and motor speed code. Refer to page 2 for more information.

Performance shown is for installation Type D: ducted inlet/ducted outlet. Power rating (BHP) does not include drive losses. Performance data is based on standard air conditions (0.075 #/ft.3). Performance ratings do not include the effects of appurtenances in the airstream. **MOST EFFICIENT FAN SELECTION APPEARS IN BOLD PRINT.** To complete model code, add arrangement, class of construction, material code, motor enclosure code, motor horsepower code and motor speed code. Refer to page 2 for more information.

Options and Accessories

Guards

Inlet and outlet guards are available for In-Line Centrifugal Fans. OSHA style, steel construction.

Belt Guard

Covers motor sheave and belts outside fan housing.

Combination Motor Cover and Belt Guard

Designed to fit belt drive in-line centrifugal fans. Covers are vented. Specify horizontal or vertical mounting.

Combination Drive Guard and Weather Cover

Covers motor and shaft sheaves as well as belts. Combines guarding of the drive as well as protection from the weather.

CAUTION: The drive assembly of the periphery of the wheel of a fan less than seven (7) feet above the floor or working level must be guarded to be in accordance with OSHA regulations.

V-Belt Drives

Constant speed (fixed pitch) or adjustable speed (variable pitch) oil, heat, and static resistant type V-Belt Drives, oversized for long life and continuous duty as standard, are available upon request.

Disconnect Switch

On-off switch mounted to the unit to provide safety during maintenance.

Drain

Standard pipe coupling, welded to the housing. Female pipe has threaded plug. Highly recommended for vertical airflow-up applications.

Inspection Door

Allows periodic visual inspection of wheel. Bolted and gasketed for tight seal. A hinged, quick release type is also available for class I only.

Prefabricated Curbs

Heavy gauge galvanized steel roof curbs, 8" or 12" high. Curbs feature a built in cant strip, welded seam construction.

Mounting Feet

Bolted to the inlet and discharge flanges, mounting feet allow positioning of the fan on the floor, ceiling, wall or platform. Can be used with vibration isolators.

Ceiling Suspension

For Horizontal Mounting:
Sizes 12" to 18" – use inverted mounting feet.
Sizes 22" to 49" – use horizontal mounting brackets.

Vertical Mounting Brackets

Four welded brackets for floor mounting or ceiling suspension.

Vibration Isolators

Rubber-in-shear or spring type isolators available for floor mount or ceiling suspension on all models.

Companion Flanges

Drilled to fit the flanges of the fan; allows easy installation.

Lifting Lugs

Facilitates Installation.

Arrangement 1 Sub-Base

Common structural support for Arrangement 1 fan and motor. Specify motor frame size and mounting position (see page 4). Vibration isolators, belt guards, and motor covers are available for Arrangement 1 with sub-base construction.

Sound Muffler

Attenuator for inlet or outlet of fan, reduces sound up to 50%. Maximum velocity 3000 FPM velocity. Contact Factory for details.

Inlet and Outlet Cones

Fabricated cones for duct transitions and/or static pressure regain.

Inlet Control Damper

Dampers are mounted on the blower's drilled inlet flange to both increase the efficiency of the system and permit control of air volume. Standard construction limits these dampers to 7" maximum static pressures and 3000 FPM velocity. For more demanding conditions please contact the factory.

SAFETY ACCESSORIES, APPLICATION AND USE WARNING

The safe application and use of equipment supplied by Hartzell Fan, Inc. is the responsibility of the installer, the user, the owner, and the employer. Since the application and use of its equipment can vary greatly, Hartzell Fan, Inc. offers various product types, optional safety accessories, and sound performance data per laboratory tests. Hartzell Fan, Inc. sells its equipment with and without safety accessories, and accordingly, it can supply such safety accessories only upon receipt of an order. The need for safety accessories will frequently depend upon the type of system, fan location and operating procedures being employed. The proper protective safety accessories to meet company standards, local codes, and the requirements of the Occupation Safety and Health Act must be determined by the user since safety requirements vary depending on the location and use of the equipment. If applicable local conditions, standards, codes or OSHA rules require the addition of the safety accessories, the user should specify and obtain the required safety accessories from Hartzell Fan, Inc. and should not allow the operation of the equipment without them. Owners, employers, users and installers should read "RECOMMENDED SAFETY PRACTICES FOR USERS AND INSTALLERS OF INDUSTRIAL AND COMMERCIAL FANS" published by the Air Movement and Control Association International, Inc., 30 West University Drive, Arlington Heights, Illinois 60004. A copy of this publication is enclosed with each fan shipped from Hartzell Fan, Inc., and is available upon request at Hartzell's office in Piqua, Ohio 45356

Please contact Hartzell Fan, Inc. or your local Hartzell representative for more information on product types, safety accessories, and sound performance estimates. Remember, the selection of safety accessories and the safe application and use of equipment supplied by Hartzell Fan, Inc. is your responsibility.

General Construction Options

Spark Resistant Construction

For safely handling fumes and vapors, Hartzell offers three types of spark resistant construction. Types A, B, and C as outlined in AMCA Standard 99-0401-86.

Type A – All aluminum fan housing, inlet cone and wheel with a ground and polished steel shaft covered with an aluminum sleeve. Inner drum sealed with covers and gaskets. Temperature limitation of 180°F. Material Code AA.

Type B – Aluminum wheel and aluminum sleeve on the shaft where the shaft passes through the housing. Inner drum sealed with covers and gaskets. Temperature limitation of 180°F. Material Code AB.

Type C – Aluminum inlet cone and aluminum sleeve on the shaft where the shaft passes through the housing. Inner drum sealed with covers and gaskets. Temperature limitation of 180°F. Material Code AC.

NOTES: No bearings, drive components, or electrical devices shall be placed in the air or gas stream. The user shall electrically ground all fan parts.

The use of the above standard in no way implies a guarantee of safety for any level of spark resistance. Spark resistant construction also does not protect against any airstream material that may be present in a system which might cause ignition of explosive gases.

Protective Coatings

An epoxy coating is available for mildly corrosive atmospheres. The finish is chemical, moisture and abrasion resistant, providing a very tough and durable coating. Surfaces are pre treated prior to coating. Finish air dries to 6 mils. Temperatures range up to 180°F. Inorganic zinc coating is also available. This finish is a very hard coating with exceptional abrasion resistance. Offers excellent weathering characteristics and resistance to alcohols, solvents, and petroleum products. Also, resistant to temperatures up to 180°F. Surfaces are sandblasted prior to application. Finish air dries to 21/2 mil thickness.

Fiberglass Fans

Where extreme corrosive fumes are encountered, Hartzell Fiberglass In-Line Centrifugal Fans, Series 40, give unsurpassed resistance to a wide variety of corrosive elements at a cost substantially below that of corrosive resistant metals. Size range of 12" to 60" wheel diameter. For complete details on Hartzell Fiberglass In-Line Centrifugal Fans, See Bulletin A-131.

Fiberglass In-Line Centrifugal Fan Series 40

Power Roof Ventilator

The belt driven in-line centrifugal fan can be mounted as a roof exhausted. Together with a stack cap and curb panel for mounting the three components combine to provide a roof unit for exhaust applications. Stack cap has back draft dampers, providing weather-tight closure for vertical air discharge.

A fusible link can be furnished as an option. This is a spring-operated, positive lid opener for power roof ventilators. When the

temperature at the stack cap lids exceeds 165° F., the fusible link allows the spring – operated lid opener to lock the stack cap lids in upright position. Provides gravity ventilation in case electricity to the ventilator is interrupted during a fire.

To prevent lid flutter when positive pressure exists in a building, magnetic latches can be furnished as an option.

CFM Limitations for Damper Lids Operation and Principal Dimensions (Inches)

Size	Without Outlet Transition *					
	Min. ¹	Max. ²	A	BB	CC	FF
12	1,930	4,750	16 ^{13/16}	22	26	43 ^{1/2}
15	2,980	7,335	21 ^{1/16}	26	32	51 ^{1/2}
18	4,255	10,475	25 ^{3/8}	30	36	59 ^{1/2}
22	6,595	16,235	31	36	42	67 ^{1/2}
24	7,490	16,435	33 ^{3/4}	41	44	73
27	9,445	26,250	37 ^{7/8}	44	48	80
30	11,630	28,630	41 ^{1/8}	48	51	86
33	14,040	34,560	45 ^{1/4}	52	55	93
36	16,680	41,055	49 ^{3/8}	56	60	100
40	21,255	52,315	55 ^{3/16}	62	65	110
44	26,170	64,410	51	68	71	120
49	31,590	77,765	57 ^{2/16}	75	71	117

*CFM limitations can be increased or decreased with installation of an outlet transition. Contact factory for additional information.

¹Minimum CFM to open lids. ²Maximum CFM to prevent lid damage. Guy wire bracing must be provided by customer when necessary.

Dimensions and specifications are subject to change. Certified prints are available.

Hartzell Warranty

LIMITED WARRANTIES

Hartzell represents to Buyer that any goods to be delivered hereunder will be produced in compliance with the requirements of the Fair Labor Standards Act of 1938 as amended.

Hartzell also warrants to Buyer its goods to be free from defects in workmanship and material under normal use and service for one (1) year after tender of delivery by Hartzell, plus six (6) months allowance for shipment to approved stocking dealers & distributors. No warranty extends to future performance of goods and any claims for breach of warranty or otherwise accrues upon tender of delivery.

The foregoing constitute Hartzell's sole and exclusive warranties in lieu of all other warranties, whether written, oral, express, implied or statutory.

LIMITATION OF LIABILITY FOR BREACH OF WARRANTY

Hartzell's obligation for any breach of warranty is limited to repairing or replacing, at its option, without cost to Buyer at its factory any goods which shall, within such a warranty period, be returned to it with transportation charges prepaid, and which its examination shall disclose to its satisfaction to have been defective. Any request for repair or replacement should be directed to Hartzell Fan, Inc., P.O. Box 919, Piqua, Ohio 45356. Hartzell will not pay for any repairs made outside its factory without its prior written consent. This does not apply to any such Hartzell goods which have failed as a result of faulty installation or abuse, or incorrect electrical connections or alterations, made by others, or use under abnormal operating conditions or misapplication of the goods.

LIMITATION OF LIABILITY

To the extent the above limitation of liability for breach of warranty is not applicable, the liability of Hartzell on any claim of any kind, including negligence, for any loss or damage arising out of or connected with, or resulting from the sale and purchase of the goods or services covered by these Terms and Conditions of Sale or from the performance or breach of any contract pertaining to such sale or purchase or from the design manufacture, sale, delivery, resale, installation, technical direction installation, inspection repair, operation or use of any goods or services covered by these Terms and Conditions shall, in no case exceed the price allocable to the goods or services which gave rise to the claim and shall terminate one year after tender of delivery of said goods or services.

In no event whether as a result of breach of contract, or warranty or alleged negligence, defects incorrect advice or other causes, shall Hartzell be liable for special or consequential damages, including, but not limited to, loss of profits or revenue, loss of use of the equipment or any associated equipment, cost of substitute equipment, facilities or services, down time costs, or claims of customers of the Buyer for such damages. Hartzell neither assumes nor authorizes any person to assume for it any other liability in connection with the sale of its goods or services.

NO IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS.

HARTZELL DOES NOT WARRANT THAT SAID GOODS ARE OF MERCHANTABLE QUALITY OR THAT THEY ARE FIT FOR ANY PARTICULAR PURPOSE. THERE IS NO IMPLIED WARRANTY OF MERCHANTABILITY AND THERE IS NO IMPLIED WARRANTY OF FITNESS.
