

General Ventilation Application

Hartzell Equipment: HartKool fans (HKA-182NB-STYAEC)

Ship Date: Ongoing

Application: (Reference 13PP-1)

Continuously cooling transformers when different loads are applied

Comments:

“Our customer had trouble with previous fans (internal). The fan blades were falling off as they were using them full time. Our standard fans are not designed for this. With the help of Preston Phipps, a fan was chosen to mount on the outside of the transformer enclosure. These fans are working great and the transformer is running cool. Our customer is extremely happy with these new fans.”
