

Industrial Application

Hartzell Equipment: Series 79 Door Heater (formerly DH22) and Hartkool Fans

Ship Date: November 2003 and May 2004

Application: (Reference 26AI-1)

Providing comfortable work temperature to employees

Pelican Metal, a Tier 1 supplier to the automotive industry, uses a DH22 door heater and eight HartKool fans to provide a comfortable work environment for its employees.

Customer Comments:

Mark Johnson, from Pelican Metal is very pleased with the Hartzell products and offers the following: “The door heater works great! The shipping door opens often in winter and the Hartzell door heater keeps the work space comfortable. In addition, the Hartzell HartKool fans work much better than other fans we’ve used. They move much more air and throw the air much further. In a competitive labor market, the HartKool fans help keep our employee’s comfortable.”
